**FCC AWARDS JUST OVER \$400 MILLION TO MINNESOTA COMPANIES TO DEPLOY
BROADBAND TO UNSERVED AREAS**

The Federal Communications Commission announced yesterday that Minnesota will be receiving nearly \$410 million dollars for broadband deployment to unserved areas through the Rural Development Opportunity Fund Phase I auction. This infusion of capital will provide broadband service to 142,841 locations. According to the FCC, 99.7% of the winning bidders nationally will be using the RDOF funds to provide broadband at speeds of at least 100 Mbps upload speed and 20 Mbps download speed. 85% of the households to be served with the RDOF funding will have access to gigabit speeds.

Staff at the Minnesota Office of Broadband Development recently reported that as of October 2020, there were 157,000 unserved households in Minnesota – meaning that 7.8% of households in Minnesota currently cannot receive broadband at speeds of at least 25 Mbps download and 3 Mbps upload. Minnesota has set a goal under state law that by 2022 all Minnesotans will have access to broadband service at speeds of at least 25Mbps download and 3 Mbps upload. With the new households to be served with the help of RDOF funds, 99.99% of Minnesota households will have access to broadband speeds at the state’s 2022 speed goal. In other words, when these services are deployed, Minnesota will have achieved “universal service” for broadband.

A broad range of providers successfully competed in the Phase I auction, including cable operators, electric cooperatives, incumbent telephone companies, satellite companies, and fixed wireless providers. The auction used a multi-round, descending clock auction format in which bidders indicated in each round whether they would commit to provide service to an area at a given performance tier and latency at the current round’s support amount. The auction was technologically neutral and open to

new providers, and bidding procedures prioritized bids for higher speeds and lower latency.

A company that is awarded support must obtain designation as an eligible telecommunications carrier (ETC) from the Minnesota Public Utilities Commission (MPUC) for the areas funded by RDOF within 180 days after being announced as a winning bidder.

The auction unleashed robust price competition that resulted in more locations being awarded at less cost to Americans who pay into the Universal Service Fund through line item charges on their telecommunications bills. Nationally, the 5,220,833 locations assigned support in the auction had an initial reserve price of over \$26 billion over the next decade; through vigorous competition among bidders, the final price tag to cover these locations is now just over \$9 billion. Providers must meet periodic buildout requirements that will require them to reach all assigned locations by the end of the sixth year. They are incentivized to build out to all locations as fast as possible.
